Water mist extract hoods

# Mistream

Britannia has developed Mistream, a cold-water mist hood, to complement its extensive product portfolio of Britstream and Ultrastream.

Mistream is designed to fit within the britstream range.

Mistream was developed to reduce the risk of fire over solid fuelled appliances such as BBQ's, grills and ovens. Mistream utilises 3 stages of filtration one of which is continuous fine mist delivered by low consumption spray heads.

The cold mist spray also aids in the reduction of in-duct, transported air temperatures as well as acting as a spark arrester.

## Features...

- High efficiency 3 stage grease filtration
- Constant atomised water mist in extract plenum
- Control cabinet with water meter, filter, pressure sensor and control valve
- Automatic actuation on start up and shut down
- Nozzle with wide angle, cone spray pattern
- Low consumption spray heads, using 3.6L per nozzle/hour at 300 KPa. (Most other systems consume in excess of 100 litres per hour)
